

KEY BENEFITS

- Address regulatory compliance guidelines: HIPAA, SOX, GLB
- Quickly restore your critical information 24/7
- Eliminate tape, CD, or DVD backups, which can be lost or destroyed and make data retrieval difficult/time consuming
- Protect company information in case of disaster by securing it in an offsite location
- Access files while out of the office
- Free up time due to automated backups

KEY FEATURES

- Auto backup at your desired time
- Easy file restore through the software or the web-interface
- Uses the latest security features and encryption processes to secure your data
- Available in two additions: a PC edition and a server edition
- Backup servers and databases
- Easy monitoring with extensive backup status reports
- Supports all common operating systems and platforms
- Restore to any version of backed up files
- Complete protection even when files are opened
- Run any application before or after a backup job
- Auto upgrade your software without human intervention
- Able to back up individual emails
- Create a local backup copy if desired

Data Security

- Data encryption: 256MB
- Option for SAS 70-certified data center storage

Secure Offsite Data Backup

Business class data backup and restore

RestoreRex™ is a professional, affordable, automatic solution for backing up your data. After the initial software download and setup, RestoreRex™ runs automatically in the background on the schedule set by the user. Restoring files is easy. Users can navigate to files either through the software on their local machine, or through the web-interface. Files can be restored to any PC or server.

Security

Your critical data is encrypted (256-bit), compressed, and then uploaded to a REMOTE server in our data center via SSL, guaranteeing security. Additionally, only the user holds their encryption key to access their data.

RestoreRex™ Clients

RestoreRex™ Online Backup Manager - OBM (Server Edition):

A comprehensive client side backup application bundled with various database backup modules for backing up files and databases from client-side computers to DISC's offsite backup server, which is most suitable for backing up servers.

RestoreRex™ A-Click Backup - ACB (PC Edition):

A light version of RestoreRex™ OBM with all major features retained while having an easy-to-use interface, which is most suitable for backing up desktop and laptop computers.
